The object of the Cash Fund is to provide capital protection. This fund can be used as part of a diversified portfolio and to protect fund values against falling markets. The Cash Fund invests in Euro denominated Bank deposits and other cash-like instruments such as certificates of deposit, treasury bills and short term bonds.

The Fund's focus is to place money with high quality counterparties i.e. banks and other issuers. The assets of the Cash Fund are largely held on deposit with highly rated international banks in order to maximise member security. The Fund's exposure to counterparty risk is rigorously managed by a policy of diversification which controls the maximum amount that may be invested in any individual country, bank or issuer. The credit worthiness of counterparties is subject to ongoing review by the Fund's Investment Manager.

As the Cash Fund is invested entirely in bank deposits and other similar instruments it may be expected to provide a return in line with Euro deposit rates with a stable capital value. The Cash Fund may be a suitable vehicle for those Scheme members who, in the years approaching their retirement, wish

to preserve the capital value of some or all of their investments (in particular that part of their fund which they plan to take as a lump sum). In the longer term, the Cash Fund is unlikely to provide a return sufficient to support members' benefit expectations.

The rate of interest available on these deposits is currently at historically low levels and likely to remain so in the near future. As a result, the net return provided by the CERS Cash Fund (after deducting management charges) is likely to be negative until interest rates increase.

The Trustee review the manager and strategies used for the Cash fund on a regular basis. Irish Life Investment Managers currently manage the CERS Cash Fund.

The management charge for the CERS Cash Fund is 0.5% p.a.
