FUND DESCRIPTION

The Fund has exposure to mainstream and non-mainstream assets including currency, commodity, forestry, infrastructure and absolute return strategies. Absolute return funds typically invests in a selection of specialist managers who are attempting to deliver long-term growth from diverse sources. They may include both traditional asset classes such as equities and bonds, or non-traditional asset classes and can include the use of derivatives. Through the asset classes and investment techniques employed by the specialist managers, the fund will in part seek sources of growth that are not correlated to equity market performance, with the aim of achieving a smoother growth path than would be achieved by equities alone. The fund may have temporary cash exposures as part of portfolio management. Further information including the CERS investment returns are available at www.CERS.ie/Funds.
